

# - ADA Co. GIS SIG - CHANGE MANAGEMENT REQUEST

## *For RoadCenterline dataset*

**Data steward:** Ada County Assessor's Office

**Reason for Change:** Accommodation of new 911 CAD software for Emergency Vehicle routing purposes & Alignment with Canyon County's Interstate Naming/Addressing Convention.

**Description of Change:**

The current naming/addressing of our interstate system needs to be updated for routing purposes of the new CAD software used by 911 Dispatch at ACSO. In addition to updating how the main interstate segments are named and addressed, the interstate ramps will also be updated with better names than they are today. Current data has; No Range Attributes; No Directional distinction; No Distinction between names of ramps and the Interstate itself. To be clear this is NOT a schema change, we are just adding more descriptive data to existing fields.

Attribute	Current concatenated value	Proposed concatenated value
Interstate	Interstate 84	EB Interstate 84
Ramp	Interstate 84	WB Interstate 84 Exit 44 Off Ramp
Interstate	Interstate 184	WB Interstate 184

**For Ramps Range Values:** Example of Current Interstate Ramp 44 / Proposed Interstate Ramp 44

Current FR: 0, FL: 0, TR: 0, TL: 0 / Proposed FR: 44, FL: 44, TR: 44, TL: 44

**For Interstate Range Values:** Example of Current Interstate 44/Proposed Interstate 44

Current FR: 0, FL: 0, TR: 0, TL: 0 / Proposed FR: 4400, FL: 4401, TR: 4498, TL: 4499

**Change Implementation Date:** November 1, 2015.
